

# Fomento Lechero

## Testimonial

**Fomento Lechero** it is a program within Sigma that seeks to develop dairy producers, the team helps producers with financial programs and genetics, always taking care of the quality of dairy production. With **Fomento Lechero** team we have been able to implement and follow up on Animal Welfare practices.

“For me it has been a long and rewarding job with the stables, to see that the cows receive humane treatment and have animal welfare. The cooperation of all those who work in stables is important and constantly work on our part to continue generating the culture of animal welfare.”
